January / janvier

E.H. Pinnington, G. Rieger, J.A. Kernahan, and E. Biemont Beam-laser measurements and relativistic Hartree–Fock calculations of the lifetimes of the $3d^9 4p$ levels in Cu II 1

A.K. Bhatia and R.J. Drachman Properties of two-electron systems in an electric field 11

P. Prado, R.L. Armstrong, and M. Krupski Nuclear quadrupole resonance study of hydrostatic pressure and substitutional impurity effects in the cubic to tetragonal structural phase transition in K_2OsCl_6 19

P.J. Prado and R.L. Armstrong Nuclear quadrupole resonance study of the cubic to tetragonal phase transition in K_2OsCl_6: Uniaxial pressure effects 33

D.D. Betts and G.E. Stewart Estimation of zero-temperature properties of quantum spin systems on the simple cubic lattice via exact diagonalization on finite lattices 47

P. Mohazzabi, J.R. Schmidt, and R.C. Wells Extraction of Boltzmann dynamics from a gas of constant-speed particles 67

Editorial / Éditorial vi

Instructions to Authors I1

February / février

J.D.N. Cheeke *Review/Synthèse.* Single-bubble sonoluminescence: "bubble, bubble toil and trouble" 77

D.F. Howarth, M.J. Mombourquette, and J.A. Weil The magnetic properties of the oxygen-hole aluminium centres in crystalline SiO_2. V. ^{17}O-enriched $[AlO_4/Li]^+$ and dynamics thereof 99

M. Senba *Erratum:* Positronium spin exchange with spin 1/2 paramagnetic species 117

Notice to authors / Note aux auteurs IFC

March / mars

P. Paddon, A.D. May, and G. Stéphan A quantitative study of the polarization states of a quasi-isotropic 3.39 μm He–Ne laser subject to weak optical feedback 119

E. Sjerve, A.D. May, and G. Stéphan A quantitative study of the polarization states of a 3.39 μm He–Ne Zeeman laser 147

P. Paddon, A.D. May, E. Sjerve, and G. Stéphan Theory of the polarization states of quasi-isotropic lasers: A reformulation in terms of Stokes parameters 167

J.K.G. Watson and A.R.W. McKellar The υ_5 band of the NO dimer 181

Notice to authors / Note aux auteurs IFC

April / avril

M.D. Saksena, R. Venkatasubramanian, and M. Singh Vibrational structure of the $A^3\Pi_0 - X^1\Sigma^+$ and $B^3\Pi_1 - X^1\Sigma^+$ transitions of gallium monochloride **191**

D.M. Danailov and D.S. Karpuzov Total reflection of energetic ions from crystal surfaces at glancing incidence **197**

S.C. Read, A.D. May, and G.D. Sheldon The Kerr effect in He, Ne, H_2, and N_2 at room temperature **211**

M.T. Attaf and S. Yaici Analyse dimensionnelle des sources d'excitation dans les convertisseurs électromagnétiques linéaires à aimants permanents **231**

P. Bracken Elementary Bethe Ansatz solution of two lattice spin models **247**

P. Bracken Quantum mechanics in terms of an action principle **261**

Notice to authors / Note aux auteurs **IFC**

May / mai

R. Majumdar and D.P. Bhattacharyya Influence of initial reacceleration phenomena by strong shock on the sub Fe/Fe ratio **273**

M. Bednar, J. Ndimubandi, and A.G. Nikitin On connection between the two-body Dirac oscillator and Kemmer oscillators **283**

A. Khrennikov On the physical interpretation of negative probabilities in Prugovecki's empirical theory of measurement **291**

M.A.K. El Adawi, El S.F.El Shehawey, S.A. Shalaby, and M.I.A. Othman The stability of natural convection in an inclined fluid layer in the presence of a temperature gradient and an a.c. electric field **299**

G.L. Pollack and D.R. Stump Two magnets oscillating in each other's fields **313**

T.E. Simos A new finite-difference scheme for the numerical solution of the Schrödinger equation **325**

P. Chatterjee and R. Roychoudhury Effect of finite ion temperature on ion acoustic solitary waves in a two-temperature electron-plasma system **337**

S. Lafortune Superposition formulas for pseudo-orthogonal matrix Riccati equations **345**

Notice to authors / Note aux auteurs **IFC**

June / juin

M. Bueno and A.K.T. Assis Equivalence between the formulas for inductance calculation **357**

R.J. Radtke and V.N. Kostur c-Axis penetration depth in the cuprates: Additional evidence for incoherent hopping **363**

M. ul-Hassan and A.D. Rawlins Radiation from a two-dimensional duct **375**

J. Madore Fuzzy space-time **385**

C.M. Van Vliet and P. Vasilopoulos Master hierarchy of kinetic equations for binary collisions II: Addenda **401**

C. Önem Radiation and energy conservation in the generalized Lorentz–Dirac equation with spin **407**

J.E. Roy and L. Shafai Generalized scattering matrix and symmetry principles for infinite planar structures **413**

M.O. Steinitz, D.A. Pink, C.P. Adams, and D.A. Tindall A model for the occurrence of lock-ins in holmium in c-axis magnetic fields **433**

Notice to authors / Note aux auteurs **IFC**

July / juillet

P. Hillion Point charge moving uniformly in a linear weakly biisotropic medium 443
M. Hebbache Elastic constants of group IV semiconductors: Microscopic theory 453
J.D. Hamilton Kinematics of electron spin 459
G.T. Andrews, J. Zuk, R. Goulding, H. Kiefte, M.J. Clouter, and N.H. Rich Raman scattering from a p^+-type porous silicon layer 473
J.X. Wang and Y.K. Ho Electron acceleration in a cone-shaped laser field 477
H.J.T. Smith Comparison of an erratic super-conducting circuit to chaotic scattering 485
F. Sammarruca On the role of the $^3F_3$ partial wave in elastic and inelastic nucleon–nucleon scattering at 800 MeV 493
M.F. El-Sayed Electrohydrodynamic instability of two superposed viscous streaming fluids through porous media 499
F. Marsiglio and J.P. Carbotte On scattering rates extracted from the optical conductivity 509

Notice to authors / Note aux auteurs IFC

August / août

B.I. Henry and J. Grindlay From dynamics to statistical mechanics in the Hénon–Heiles model: Statistical mechanics 517
B.I. Henry and J. Grindlay Statistical surface distributions for constant-energy ensembles 539
M.S. Khan, Sk.S. Ali, P. Singh, H. Khushnood, A.R. Ansari, M.A. Nasr, T. Ahmed, and M. Irfan Some interesting results on compound multiplicity in ^{12}C-nucleus reactions at 4.5 A GeV/c 549
A.D.O. Bawagan Diffuse reflectance of polymer mixtures subjected to broadband synchrotron radiation 559
V.V. Borisov and I.I. Simonenko Formation of Bessel–Gauss focus wave modes 573
A.F. Antippa On the derivation of the rotation operator 581
C.C. Dey, B.K. Sinha, and R. Bhattacharya Self-consistent measurements of angular correlation of the 321–177 and 204–177 keV cascades in ^{125}Te 591

Notice to authors / Note aux auteurs IFC

September / septembre

A. Hirose and M. Yamagiwa *Rapid communication/Communication rapide:* Effects of radial gradient of the Shafranov shift on the kinetic ballooning and drift-type modes in high-performance tokamaks 599
M.F. Collins and O.A. Petrenko *Review/Synthèse:* Triangular antiferromagnets 605
T. Do-Nhat Full translational addition expressions via cylindrical wave function transformation for Mathieu wave functions 657
T. Do-Nhat and R.H. MacPhie Accurate values of prolate spheroidal radial functions of the second kind 671
N.C. Kallas et R.H. Kallas Déplacements Goos–Hänchen et Imbert à la réflexion totale sure l'interface séparant deux milieux relativement mobiles normalement au plan d'incidence 677

Notice to authors / Note aux auteurs IFC

October / octobre

H.H. Pham and A. Nathan *Rapid communication/Communication rapide:* Rapid evaluation of the potential field in three dimensions using exponential expansion 689
G. Junker, P. Roy, and Y.P. Varshni Quasi-classical investigation of nonpolynomial central potentials with broken supersymmetry 695

M.R.M. Witwit and N.A. Gordon Calculating energy levels of a double-well potential in a two-dimensional system by expanding the potential function around its minimum **705**
C. Wolf Time-asymmetric Markov environmental effects on spin systems **715**
R.A. Holt, T.J. Scholl, and S.D. Rosner Laser-rf saturation spectroscopy: A novel fast-ion-beam sub-Doppler method **721**
N.G. Kafoussias and N.D. Nanousis Magnetohydrodynamic laminar boundary-layer flow over a wedge with suction or injection **733**
E.B. de Araujo, J.A. Magalhães de Abreu, R.S. de Oliveira, J.A.C. de Paiva, and A.S.B. Sombra Structure and electrical properties of lithium niobophosphate glasses **747**
L.K. Chen, D. Kiang, A.H. Chan, and C.K. Chew *Note:* Two-particle correlation, multiplicity distribution, and intermittency **759**
M. de Montigny and L. Marleau *Erratum:* Pair production of leptoquarks scalars in hadron colliders **765**

Notice to authors / Note aux auteurs **IFC**

November / novembre

F.S. Cataliotti, C. Fort, M. Prevedelli, and M. Inguscio *Rapid communication/Communication rapide:* Full resolution of the Autler–Townes Zeeman multiplet for cold cesium atoms in three-level Λ-type configuration **767**
J. Gascon and J.L. Pinfold *Review/Synthèse:* Results from LEP 1.5 **775**
M. Korek Analytical expressions for the high-order Herman–Wallis coefficients of a diatomic molecule **795**
R. Shamseddine On the resolution of the wave equations of electron in a space of constant curvature **805**
V. Ter-Mikirtychev and T. Tsuboi On the nature of the 735 nm luminescence band in coloured LiF crystals **813**
U. Wötzel, W. Stahl, and H. Mäder The influence of an off-resonant pump radiation in Fourier transform microwave spectroscopy **821**
M. Mazzoni and Y.N. Joshi Relative photoabsorption cross section of neutral palladium **831**
J.R. Mureika A simple model for predicting sprint-race times accounting for energy loss on the curve **837**

Notice to authors / Note aux auteurs **IFC**

December / decembre

M. Auzinsh *Tutorial/Article didactique:* Angular momenta dynamics in magnetic and electric field: Classical and quantum approach **853**
L. Novakovic Dipole–dipole forces and a proton intersite separation in hydrogen-bonded ferroelectrics **873**
J.L.V. Lewandowski A simple model for collisional drift waves **891**
Y.P. Varshni Exact solution for the ground state of a confined potential **907**
S. Singh and B.S. Bains Pion–nucleon elastic differential and total cross sections at GeV energies **913**
A. Helaly, E.A. Soliman, and A.A. Megahed Electromagnetic wave scattering by nonuniform plasma sphere **919**
